

Amur  
leopard  
By HARRY HIRST

## WHERE THEY LIVE

Amur Leopards live in Asia in the Russian far east. They live in forests where it's hot. They also like living in the mountains.

Amur Leopards eat deer, boar and rodents. To hide from prey they hide behind trees and eat the scrap from dead animals.

## WHAT THEY EAT

# WHY THEY ARE CRITICALLY ENDANGERED

They are critically endangered because of their fur which is used for coats and carpets, there are many teams trying to stop it.
